

Project CY 8609

Task

1. Describe the technical facility located via:

SG1A

2. Within the following ten year period determine if and when any "special events" occur:

1978

1988

* Note: If you do find any "special events" - - - subsequent sessions will be focused on each separate "special event."

place machine

54½' Spud standard matrix/cooling etc. Some mass.
Equipment involved w/projects above. 3-5 times as
tall as a person. Very complex - tubes, pipes, cable
heat, etc., meters, dials, fail safe, redundant
circuit, steady operation; not fluctuating - as it fluctuates
would be disadvantageous to purposes. Human loss
sound steady. Basin monitor/controller. watches
take out makes adjustments in response to order
from elsewhere in bldg. "Basement" and seems to be
under part A at least; ^{interconnected} passageway
cubits; rooms; ~~etc~~

By way of analogy - if this were a submarine, it would have all its hatches closed & locked, periscope retracted, and dead in the water on the bottom while all kinds of activity takes place. During trials, its' like site is "basically sealed" to prevent any leaking getting out to outsiders as to a boat taking place.
